## About Tarpon Investimentos

We are an independent asset manager dedicated to value-oriented investments in public and private equity. Our goal is to provide, in the long-run, above-market returns.

Our investment philosophy is supported by six tenets:

#### Focus on intrinsic value

We search for investments that, in the long-run, provide above-market returns and where market prices reflect a substantial discount to intrinsic value.

#### Portfolio concentration

We believe in concentration: each invested company has a meaningful impact on the portfolio and allows us to obtain deep understanding of these companies.

### Contrarian approach

We look for investment opportunities that are not evident and that are generally overlooked by the public market. We aim to develop an independent view from market consensus.

### **High Conviction**

We have a disciplined investment process that allows us to have a high degree of conviction related to each investment decision.

### Long-term perspective

We are looking at long-term time frames to capture the potential value of each investment.

#### **Value Creation**

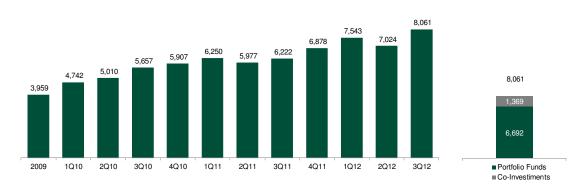

We often work to develop a value creation agenda together with our invested companies.

## Assets under management

## Investment Strategy

We conduct our asset management activity through two main investment strategies:

#### **Portfolio Funds**

(Public and private equity investments)

The Portfolio Funds strategy comprises the Tarpon Funds that invest in either public equities or privately held companies in Brazil or other Latin American countries.

As of September 30<sup>th</sup> 2012, AuM allocated to the strategy amounted to R\$6.7 billion.

#### **Co-Investment Strategy**

(Public and private equity investments)

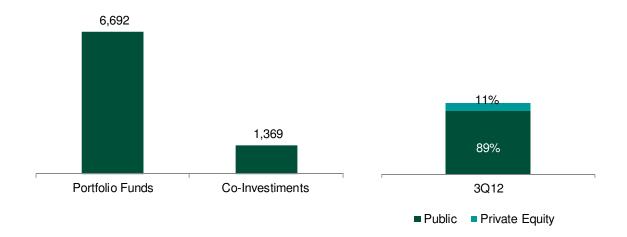

The co-investment strategy serves as a sidecar/co-investment structure whose primary objective is to increase Tarpon's exposure to selected invested companies.

As of September 30<sup>th</sup> 2012, AuM allocated to the co-investment strategy amounted to R\$1.4 billion.

As indicated in the chart below, public-equity allocation accounted for 89% of our AUM in terms of invested capital. Private-equity investments, at fair value, accounted for the remaining 11%.

## **Operating revenues**

Operating revenues are composed of revenues related to management fees – recurring income flow based on the Tarpon Funds' net asset value – and revenues related to performance fees income flow with higher volatility based on the performance rendered by the Tarpon Funds.

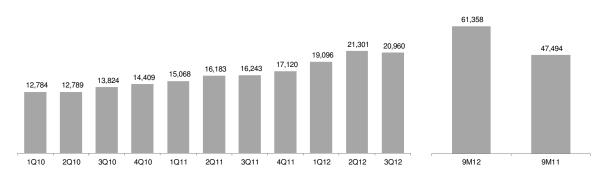

#### Revenues related to management fees

Management fees are charged on the Tarpon Funds based on the amount of called capital.

During the quarter, gross revenues related to management fees amounted to R\$21.0 million, equivalent to 97% of the operating revenues on the quarter. These revenues decreased 2% when comparing 3Q12 with 2Q12 and presented a 29% increase when compared to 3Q11.

# Management fees revenues - R\$'000

### Revenues related to performance fees

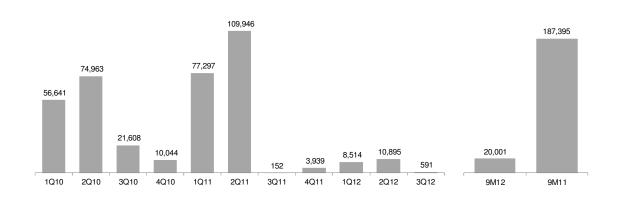

The Tarpon Funds are entitled to collect performance fees when their performance exceeds certain hurdle rates. The majority of the Tarpon Funds' hurdles vary from 6% per year to an inflation index plus 6% per year.

The Tarpon Funds include the concept of a high water mark. Performance fees are charged only if the net asset value (NAV) of the fund's shares exceeds the NAV of the previous date of performance fee collection, adjusted for the hurdle rate.

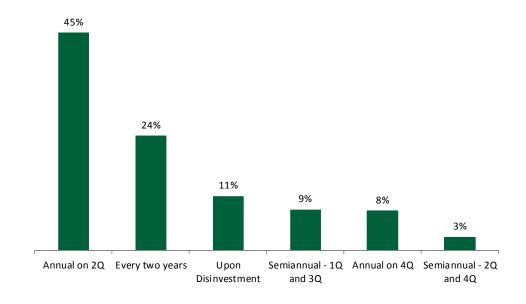

In the quarter, revenues related to performance fees amounted to R\$0.6 million, accounting for 3% of overall operating revenues. In the year, these revenues decreased 95% when comparing with 2Q12 and increased 289% when compared with 3Q11.

### Performance fees revenues - R\$'000

Below you will find our current performance collection schedule as a % of AuM:

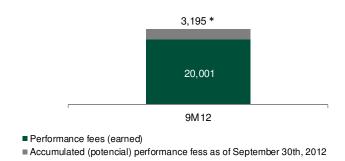

As of September 30<sup>th</sup>, 2012, 16.26% of the Tarpon Funds' NAV was above their respective high water marks.

The Tarpon Funds are entitled to collect performance fees on distinct dates. As presented in the following chart, for illustrative purposes, if 100% of the Tarpon Fund's net asset value had been charged performance fees as of September 30<sup>th</sup> 2012, the additional amount in revenues related to performance fees would have been R\$3.2 million (potential revenues based on the net asset value of funds as of such date). As we cannot predict the Tarpon Funds' performance, we cannot guarantee that this potential amount will be owed to Tarpon at any future date. The amount shown below may differ substantially from the actual realized amount.
